

Henrique Ailer

Full-stack Developer · Python · AI Automation · QA Engineering

PROFESSIONAL SUMMARY

Full-stack Developer with 3+ years of experience in AI automation, process engineering, and QA. Built TypeAssist at Kyndryl — a Python tool that cut Average Service Time by 40% across 75+ daily enterprise tickets. Mentored 200+ students across 30+ real-world ML projects at Samsung Innovation Campus. Currently at ATRIA Corp working with LLM testing, FastAPI, n8n, and AI-driven pipelines following Agile practices Seeking on-site, hybrid, or remote roles within the EU.

EXPERIENCE

Jr. QA Analyst | ATRIA Corp
São Paulo, Brazil · Hybrid

Mar 2026 - Present

- Reviewed 10+ client projects, identifying critical defects before production across the full software lifecycle.
- Conducted LLM tuning and testing, contributing to AI-driven quality pipelines.
- Orchestrated automated workflows with N8N and Claude Code.
- Collaborated with cross-functional teams following Agile methodology to enforce quality standards and accelerate release cycles.

Technical Support Analyst | Kyndryl
Hortolândia, São Paulo, Brazil · Hybrid

May 2025 - Mar 2026

- Built TypeAssist, a Python automation tool (PyAutoGUI, pyperclip) handling 75+ daily enterprise support tickets and reducing Average Service Time by 40%.
- Standardized service processes with Python scripts, improving SLA metrics by 80% and enabling real-time monitoring.

Student AI Mentor | Samsung Innovation Campus
Campinas, São Paulo, Brazil · Remote

May 2023 - Dec 2025

- Mentored 200+ students across 3 consecutive years of the Python & AI program, guiding 30+ collaborative ML/AI projects with code review and architecture feedback.
- Promoted in 2024 to support course management: automated data collection pipelines (reducing process time by 95%) and produced structured performance reports.
- Recognized as Outstanding Student (2022) before joining as a mentor, based on academic performance and project quality.

KEY PROJECTS

TypeAssist - Kyndryl

Jul 2025 - Mar 2026

- Python automation tool built with PyAutoGUI, Pyperclip, and OOP architecture; eliminated repetitive form-filling workflows across enterprise-scale ticket operations at Kyndryl.

TagSeek - School Property Management System

Aug - Dec 2024

- Directed a 5-member team to deliver a REST API for real-time property tracking; designed the database and backend to handle 500+ tracked items and managed Git version control.

RocketONE - Rocket Shot Distance Prediction (ML)

Aug - Dec 2022

- Trained a linear regression model to predict rocket reach, achieving 97% precision; performed accuracy testing and dispersion analysis across 50+ test cases, with full technical documentation authored

SKILLS

Languages & Frameworks: Python, FastAPI, Django, JavaScript, TypeScript, PHP, Java, HTML, CSS, Bootstrap, React

AI & Machine Learning: Machine Learning (scikit-learn, linear regression), LLM testing & fine-tuning, AI automation (n8n, Claude Code), data analysis & collection pipelines

Databases & APIs: MySQL (modeling & normalization), NoSQL concepts, REST API design & integration, Postman, Webhooks

DevOps & Tooling: Git, Docker, technical documentation & test engineering, Agile methodology

Languages: English (Advanced · C1), Italian (Intermediate · B1), Spanish (Basic · A2), Portuguese (Native)

CERTIFICATIONS

Prepare Data for ML APIs on Google Cloud	Google (Credly Skill Badge)	Dec 2024
Python & AI Introduction Certification	Samsung Innovation Campus	Dec 2022

AWARDS & HONORS

Outstanding Student	Samsung Innovation Campus - top performer of 2022 Python & AI cohort	Dec 2022
1st Place, Engineering	Feira Paulista de Ciência e Tecnologia - AI robot among 30+ competing projects	Dec 2021

EDUCATION

Bachelor's Degree in Computer Engineering	Universidade Virtual do Estado de São Paulo (UNIVESP)	Jul 2025 - Jun 2030 (expected)
Technical Degree in Systems Development	SENAI Santa Bárbara d'Oeste "Alvares Romi"	Feb 2023 - Dec 2024
